Why use this database at Mynan

Mynan web development is ment to help students get jobs quickly by assisting students with learning what they need to learn to get a job and by building them a portfolio and resume that can get them jobs with employers. The database collects the necessary data in order to facilitate classes. The Mynan_Staff table is very fundamental to the implementation of this database. Almost all other tables and entity classes will be reliant on this table / entity type. The class being. The carrer_Coach is a subtype but in its sql it looks more like a table that references another table. These are a few examples of a number of items that you may need to keep track of inorder to keep track of all the moving parts of a web development bootcamp.

At this bootcamp, it is very important that each student has access to a resume where they are required to build a resume. This resume and portfolio is required to have one project that they complete while attending required class inorder to learn their required course. These requirements make it so that each student who enrolls in the course will always leave with something that is easy to use and get a job with.

With the database at mynan webdevelpment broadcasting to the internet. Students will always have access to the evidence of their accomplishments andand reference numbers via the apis that the school will give to students a little while after it comes out. This will benefit the graduates of the school by allowing them to not worry about keeping track of the items that many recruiting companies and hiring managers look for. Even information that relates to what students have done outside of the boot camp like their past job experience will be saved on our database. Students will be encouraged to record their past experience into our database. This data often includes names of those they have worked with in the past(references) and their phone numbers.. Having access to a company's servers for a long period of time will allow

students to show off their work without the unfortunate possibility that you lose the evidence of

your accomplishments.
